Parts Cleaners Equipment: Parts washers combined with specific solvents give you quick, thorough cleaning and de-greasing while reducing the amount of hazardous waste you generate.

Company/Contact	Phone	Cost/Product Information

Safety-Kleen/ John Cutshall	(303) 761-1365	Have three major types of parts cleaners: <u>Type 1: SK Cyclonic Parts Cleaners.</u> Patented Cyclonic filtration continuously spins to take dirt out of solvent. Uses their high flashpoint solvent. <u>Type 2: SK Multi Level Parts Cleaners.</u> Adjustable parts cleaner which uses their aqueous solvent. <u>Type 3: SK Model 81 Air Lift Parts Cleaner.</u> Mostly used for larger jobs. It has a combination of air-driven agitation and solvent soaking which uses their lower flashpoint solvent.
Zep Manufacturing/ Mike Wilson	(303) 373-1371	Offer a 30 gallon or a 65 gallon unit. No need to change the solvent with these units. The solvent stays clean by periodically changing the filter.

Parts Washers/Alternative Solvents

Company/Contact	Phone	Cost/Product Information
Safety-Kleen/ John Cutshall	(303) 761-1365	There are three types of alternative solvents. Type 1 (AquaWorks) is an aqueous based Arm and Hammer solvent which is non-flammable. Type 2 is a 150 degree flashpoint solvent and Type 3 is a less expensive 105 degree flashpoint.
Solvent Kleene	(508)531-2279	Two types of solvents: Degrease 500 is a hybrid hydrocarbon, non-reactive, and aromatic solvent with a flashpoint of 145.6 degrees. Degrease 1000 is the same type except it has a lower flashpoint of 111 degrees.
TechniSolv/ Joe Janike	(303) 388-8200	TechniSolv has a 140 degree flashpoint solvent and a 105 degree solvent.

Oil Filter Crusher Equipment: Using an oil crusher is quick, easy and removes the most possible oil from your filters. Whereas simply draining the filter retains up to 44% of the filter's oil.

Company/Contact	Phone	Cost/Information
Safety-Kleen/ John Cutshall	(303) 761-1365	Safety-Kleen Model 35 uses 100,000 pounds of forces to crush filters. One drum can hold as much as four drums of uncrushed filters. This model lets you squeeze out over 9 ounces of oil per filter, with a 40 second cycle time or 30 seconds with a chamber insert.
